programming language, programming languages  
(Nomen)  
Definition: code of reserved words and symbols used in computer programmes, which give instructions to the computer on how to accomplish certain computing tasks  
Übersetzung: Programmiersprache  
Beispiel: They learn the programming language at university.  
Synonym(e): computer language

programmer, programmers  
(Nomen)  
Definition: a person who designs software  
Übersetzung: Programmierer  
Beispiel: She used to work as a programmer at a computing centre.

programme, programmes  
(Verb)  
Definition: to enter a programme or other instructions into a computer (or other electronic device) to instruct it to do a particular task  
Übersetzung: programmieren  
Beispiel: His job is to programme the machines.

hacker, hackers  
(Nomen)  
Definition: one who is expert at programming and solving problems with a computer and therefore knows how to illegally enter a secured system  
Übersetzung: Hacker
A hacker just got into our network and downloaded some files.

**computer virus, computer viruses**

(Noem)

**Definition:** a programme which can damage a system or data and can be transmitted between computers via network or removable storage generally without the knowledge or consent of the recipient

**Übersetzung:** Computervirus

**Beispiel:** A computer virus caused my computer to break down.

**virus protection**

(Unzählbares Noem)

**Definition:** a programme used to protect a computer system from viruses

**Übersetzung:** Virenschutz

**Beispiel:** Do you know a free virus protection software?

**firewall, firewalls**

(Noem)

**Definition:** the software that monitors traffic in and out of a private network or a personal computer and allows or blocks such traffic depending on its perceived threat

**Übersetzung:** Firewall

**Beispiel:** The firewall prevents the window from opening.

**worm, worms**

(Noem)

**Definition:** a self-replicating programme that propagates widely through a network

**Übersetzung:** Wurm

**Beispiel:** Have you ever had a worm in your network?
**bug, bugs**  [bʌɡ]  
*(Nomen)*

*Definition:* a problem that needs fixing, especially in computing

*Übersetzung:* Programmfehler

*Beispiel:* The software bug led the computer to calculate 2 plus 2 as 5.

**crash**  [kærʃ]  
*(Verb)*

*Definition:* to cause a task to terminate extraordinarily

*Übersetzung:* abstürzen

*Beispiel:* Double-clicking this icon crashes the desktop.

**error, errors**  [ˈɛrə(ʊ)]  
*(Nomen)*

*Definition:* a failure to complete a task, usually involving a premature termination

*Übersetzung:* Fehler

*Beispiel:* I need to find out what caused the error.

**manual, manuals**  [ˈmænjuəl]  
*(Nomen)*

*Definition:* a booklet that instructs on the usage of a particular machine

*Übersetzung:* Handbuch

*Beispiel:* I think I should read the manual before I set up my new computer.

*Synonym(e):* handbook

**hotline, hotlines**  [ˈhɒtlain]  
*(Nomen)*
Definition: the telephone line that is always staffed and able to give immediate assistance; its telephone number

Übersetzung: Telefondienst

Beispiel: If you’ve got any problems with the product, ring our hotline.

user, users [ˈuːza(r)]
(Nomen)
Definition: a person who uses a computer or a computing network, especially a person who has received a user account

Übersetzung: Benutzer

Beispiel: Our network has three users.

user-friendly
(Adjektiv)
Definition: designed to be easy for an untrained user to use; especially (for a computer system) having a uniform look and feel and standard widgets

Übersetzung: benutzerfreundlich

Beispiel: The new operating system is very user-friendly.

application, applications [ˌæpliˈkeɪʃən]
(Nomen)
Definition: a computer programme or the set of software that the end user perceives as a single entity as a tool for a well-defined purpose

Übersetzung: Anwendung

Beispiel: The iPhone application VR+ connects to major social networks.

word processing
(Unzählbares Nomen)
Definition: the act of processing and converting texts
Übersetzung: Textverarbeitung
Beispiel: The software company has just released a new word processor.

**word processor**, word processors
(Nomen)
*Definition:* software that provides word processing functions on a computer, typically including typeface selection, line justification and other formatting, pagination, and numerous other features

Übersetzung: Textverarbeitungsprogramm
Beispiel: The word processor I am using is not very user-friendly.

**database**, databases ['dɛrtəbəs]
(Nomen)
*Definition:* a collection of (usually) organised information in a regular structure, usually but not necessarily in a machine-readable format accessible by a computer

Übersetzung: Datenbank
Beispiel: I have a database of all my contacts on my computer.

**spreadsheet programme**, spreadsheet programmes
(Nomen)
*Definition:* a software designed to process tables and charts

Übersetzung: Tabellenkalkulationsprogramm
Beispiel: I don’t have a spreadsheet programme on my computer.

**installation**, installations ['ɪnstəleɪʃən]
(Nomen)
*Definition:* the act of setting up a new software or application on a computer

Übersetzung: Installation
Beispiel: The installation could not be completed.
install  [ɪnˈstæl]  
(Verb)  
Definition: to connect, set up or prepare something for use; to establish  
Übersetzung: installieren  
Beispiel: I haven't installed the new operating system yet because of all the bugs.  
Antonym(e): uninstall

run  [rʌn]  
(Verb)  
Definition: to be operating or working normally  
Übersetzung: laufen  
Beispiel: That computer runs twenty-four hours a day.

programme, programmes  [,prəʊˈɡræm]  
(Nomen)  
Definition: a software application, or a collection of software applications, designed to perform a specific task  
Übersetzung: Programm  
Beispiel: I need a programme to create media presentations.  
Synonym(e): application
